Government securities are a fraction lower on nearly all descriptions. The coupon five-twenties closed at

105%. The secession gold gamblers were in a measure kept down to-day, and the exchange remained calm. Whether the excitement of vesterday overcame them to such a de gree as to cause a pervous reaction, or whether the fixed reaching one hundred per cent had the effect of driving sympathizers from the field, we are not prepared that the market was weak during most of the time, and the quotations ranged along the fractions above 190.

The money market is less easy, in anticipation of the renewed government demand, and the rate of interest is rly above six per cent. The supply, however, more than counts the demand.

The rumor in relation to the Secretary of the Treasury ing forced to call on the banks of this city, Philadelphia and Beston for a loan of fifty millions of deliars has ndation. We learn from responsible authority that the necessities of the government are not so pressing at The ten-forty loss new yields nearly a million and a half a day, and when the liabilities of the country have accumand a sudden and extraordinary use of funds he has e, as well as the right to throw additional bonds of command a premium of tweive to fourteen per cent.

port of the rebel Secretary of the Treasury, Mr. Mem-minger, to the Richmond conclave which the traitors denominate a Congress, is just no currency at all. There is not sufficient left of it to form a shadow. It will be reping out the whole of the seven hundred and fifty was for the purpose of restoring their currency to the specie basis, when a new trace should be Their miserable government, in the meanexpenses. The loan was to bear six per cent interest, together with the principal, was to be free from qual to colu in all cases, and to secure the payment the act provided that the entire import and export duties, innavai stores, should be pledged. Immediately after the il passed the loan was offered to the public; but there struggle to rob the people and to beister up the rebel with a show of credit, the traitorous Secretary of the Treasury offered all kinds of inducements to bring up subscribers to the loan. But, failing in his endeavors, as a t auction in Richmond on the 12th of May lost, for what ald bring. The success of this Spancial move-Congress, dated eight days subsequent to the time at thich the sale was to take place. He says "inflitary necessities prevented the sale and required its postpone-ment," in consequence of which he tells the Congress that other means must be resorted to to get money. What they now propose to do we have yet to learn; and, in the meantime, we solicit the attention of the English and French capitalists who have investments in the "Confederate securities" on the other side of the Atlantic to the above facts.
